

Integrate Square with Your QuickBooks Account Using Connex

Still manually entering data from Square into QuickBooks? Connex's Square QuickBooks integration can bridge the gap between your Square sales data and QuickBooks. With Connex, you have an automated two-way sync between Square and QuickBooks. No more long hours are spent on tedious data entry! With our signature technology, the powerful Rules Engine, you have flexibility in how you map fields between Square and QuickBooks.

What information does Connex automatically sync between Square and QuickBooks?

The Connex team will help set up the Square integration with QuickBooks Desktop or Online during onboarding to ensure everything is optimized to suite your business needs. Once you are set up, you will have peace of mind that with Connex you have an automated sync between QuickBooks and your Square account:

- Two-way inventory sync between Shopify and QuickBooks.
- Sync sales receipts or invoices.
- Sync merchant fees.
- Sync partial and full refunds.
- Sync individual orders or daily summary.
- Match deposits with payouts from Shopify.
- Customize customer mapping.
- Build assemblies.
- Customize to your business through custom field mapping and the powerful Rules Engine.
